

MOHAMMAD IQBAL JAFFAR

Bandung, Jawa Barat | (+62) 81388670054 | iqbaljaffar1108@gmail.com

A 24-year-old Informatics Engineering student at Universitas Teknologi Bandung specializing in Full-Stack Web Development. Proven experience in engineering robust backend architectures for real-world operational workflows and building interactive, user-centric frontend applications. Brings a strong analytical perspective as a Bangkit Academy Machine Learning alumnus, adept at integrating AI technologies into scalable web solutions to deliver high-impact digital products.

EDUCATION

UNIVERSITAS TEKNOLOGI BANDUNG – Bandung
Bachelor of Informatics Engineering

(October 2022 – June 2026)

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, PHP, JavaScript, TypeScript
- **Data Management:** MariaDB, Firebase, Roboflow
- **Interactive Visualization:** Streamlit, Tableau
- **Version Control & Collaboration:** GitHub
- **Deployment & Cloud Platform:** Vercel

WORKING EXPERIENCE

Programmer (Remote) | Iwasaki Keiei, Jepang

(June 2025 – April 2026)

- Digitized critical manual workflows for Sales, Catering, and Audit departments by developing robust backend systems that support real-time status tracking and dynamic management.
- Automated complex financial reporting by engineering SQL logic to aggregate daily/monthly transactions, significantly reducing manual errors in payroll and accounting exports.
- Ensured data integrity and system reliability by implementing strict server-side validation, secure transaction handling for payments, and logical deletion mechanisms for safe data recovery.

PROJECT

- **JLPT Arcade - AI-Powered Japanese Learning Platform (2026):** Developed an interactive web application for JFT and JLPT exam preparation. Integrated Google's Gemini AI to generate dynamic Kanji quizzes and contextual grammar (Bunpou) exercises, creating a personalized and highly engaging learning experience for Japanese language students.
- **Ztyle - Full-Stack E-Commerce Platform (2025):** Engineered a comprehensive e-commerce web application using Next.js, Prisma, and PostgreSQL, featuring secure user authentication, dynamic product catalogs, and order management workflows.
- **Anxiety Attack Severity Prediction (2025):** Built a machine learning model to predict anxiety attack severity (Mild, Moderate, Severe, Panic) using a Kaggle dataset with 12,000+ records, leveraging TensorFlow Transform (TFT) for feature engineering and deep learning with Keras. Deployed on Railway and Docker with real-time monitoring via Prometheus and Grafana to enhance model performance and usability.
- **Football Fake News Classification (2025):** Built a binary classification model using TFX components (SchemaGen, StatisticGen, Transform, ExampleGen, Tuner, Trainer, Evaluator, Resolver, Pusher) to detect fake and real news about football, achieving 91.88% accuracy and deployed it using Docker.
- **Automated Nutrition Fact Recognition and Sugar Content Extraction (2024):** Developed a CNN-based classification model to identify and extract nutrition fact tables from supermarket images, integrating OpenCV for precise table cropping and PaddleOCR for text extraction, focusing on sugar content in grams, achieving an F1-score of 0.8550 with strong classification performance.

TRAINING & CERTIFICATION

- **Specified Skilled Worker (SSW) - Automobile Repair and Maintenance** (May 2026)
Passed the technical and Japanese language assessments for the automotive maintenance sector, demonstrating adaptability and readiness for standardized technical workflows.
- **Japan Foundation Test for Basic Japanese (JFT-Basic) A2** (April 2026)
Demonstrated basic Japanese language proficiency equivalent to CEFR A2/JLPT N4, capable of engaging in everyday conversations and professional interactions.
- **Magang Studi Independen Bersertifikat (MSIB) | Bangkit Academy** (September 2024 - December 2024)
Completed the Machine Learning Cohort by earning 8 professional certifications and developing GlucoScan, a CNN-based nutrition label analyzer achieving 83% accuracy.
